

OUR PRODUCTS

Exodus International is a global specialist in the design and production of premium quality products for underwater welding and cutting. Innovation, quality, and service are our guiding principles, helping us meet the high demands of our customers around the world. We also strive to maintain ongoing dialogue with our customers to improve and develop new products that can contribute to their business success.

All our products are manufactured in the Netherlands and distributed worldwide through our network of official distributors.

UNDERWATER EXOTHERMIC CUTTING ELECTRODES

Exodus Exothermic Cutting Electrodes provide astonishing performance in the most demanding situations. The balanced physical and metallurgical construction ensures effortless electrode (re)ignition. Generating an extreme temperature of approximately 6000°C, the electrode is capable of cutting or melting almost any material. The electrode can be used in both underwater and surface work. To use the electrode, all you need is a suitable underwater cutting tong, a DC welding inverter, a circuit breaker, and an oxygen supply. The electrode can even be ignited using a 12V DC battery, and even when the power is cut off, the electrode will remain ignited as long as a sufficient oxygen supply is maintained. In any case, when cutting conductive materials, the use of amps is recommended to generate higher temperatures and improve the cutting process (generally up to 150A).

SPECIFICATIONS

Universal diameter of 3/8" (9.5mm)	Available in two sizes: 18" (46cm) and 36" (92cm)
Special coating that increases connectivity	Simple and fast (re)ignition
Durable blue heat shrink tubing for optimal electrical insulation and safety	
Exodus Exothermic Cutting Electrodes are supplied in handy, durable plastic boxes of 50 units (approximately 9 kg) for the 18" model and 50 units (approximately 18 kg) for the 36" model.	

ORDER INFORMATION

ORDER N°	DESCRIPTION
MV-ET004	Exodus Exothermic Cutting Electrodes, 3/8"x18" (46cm), box of 50 units
MV-ET005	Exodus Exothermic Cutting Electrodes, 3/8" x 36" (92 cm), box of 50 units
